Aaleyah Lewis

Accessibility, Human-Computer Interaction
alewis9@cs.washington.edu | aaleyahlewis.github.io

EDUCATION

Doctor of Philosophy, Computer Science and Engineering   Expected Graduation Date: June 2026
University of Washington
Coursework: Artificial Intelligence, Machine Learning, Human-Computer Interaction, Data Visualization
Teaching: CSE 440: Human-Computer Interaction
Recognition: GEM Fellow, ARCS Foundation Scholar

Bachelor of Science, Computer Science; Minor: Psychology   Graduated: May 2021
University of Maryland, Baltimore County (UMBC)
Graduated with Honors
Merit Scholar, McNair Scholar, LSAMP Scholar, CWIT Affiliate

SKILLS

Programming: Python, C++, C, JavaScript, React, HTML/ CSS, SQL, R, RobotC
Software: Terminal, Jupyter Notebook, Autodesk Inventor, Microsoft Office (Word, PowerPoint, Excel)
Research: Qualitative, Quantitative, Mixed-Methods Approach, Participatory Design, Co-design, Ethnographic Observation
Interest: Accessibility, HCI, Natural Language Processing, Responsible AI/ML
Operating Systems: Mac OS

RESEARCH PROJECTS

Towards Intersectional Speech Recognition for African American English Speakers with Dysfluencies
Lead Researcher | CSE | University of Washington   2023 - Ongoing
- What tasks do African American English speakers with speech disabilities seek when using speech recognition systems?
- What are the experiences, perceptions and challenges of African American English Speakers who have speech disabilities when using speech recognition systems?
- How do sociocultural factors, including race and linguistic background, influence the adoption and utilization of speech recognition systems among African American English speakers who have speech disabilities?

Working at the Intersection of Race, Disability, and Accessibility
Collaborator | CSE | University of Washington   Spring 2023
This work establishes a framework for meaningfully engaging at the intersection of race and disability in accessibility work by highlighting considerations at each stage of the research process. Further, it presents a series of exemplary case studies exploring the potential for research that lies at the intersection of race and disability.

Deceptive and Inaccessible: Examining Experiences of Deceptive Design with People Who Use Visual Accessibility Technology
Lead Researcher | CSE | University of Washington   Spring 2023
- What deceptive design patterns do people who use visual accessibility technologies encounter in online services?

- How do people who use visual accessibility technologies navigate deceptive design patterns and associated access barriers in online
- How do deceptive design patterns impact online experiences of people who use visual accessibility technologies?

RESEARCH EXPERIENCES

Oak Ridge National Laboratory, *GEM Fellow*   June 2021 – August 2021
Skills/Tools: JavaScript/React, Elasticsearch
- Developed web application using JavaScript/React to assist cyber analysts in detecting anomalous behaviors on machines
- Implemented interactive data visualizations (i.e., treemap, collapsible tree) with filtering systems using JavaScript

Stanford University, *Summer Undergraduate Research Fellow*   June 2020 – August 2020
Stanford Ocean Acidification Experience
Skills/Tools: Python (Pandas, NumPy)
- Created python program to calculate and collectively summarize tracking data (i.e. head translation, hand translation) of participants during VR experience
- Generated python script to organize summarized tracking data in order to enable easy access

University of Maryland, Baltimore County, *Research Assistant*   Sept 2019 – Dec 2019
Sleep Analytics by Analyzing Leg Movements During Sleep
Skills/Tools: Python (Pandas, NumPy), Jupyter Notebook
- Used Python to collect and analyze physiological data (i.e. Blood Volume Pulse, Heart Rate, Accelerometer)
- Used Python to generate graphs that plotted distribution of physiological data
- Implemented algorithm that calculated root mean square (RMS) of physiological data

Cornell University, *LSAMP Research Scholar*   June 2019 – August 2019
Leveraging Big Data to Mediate Online Conflicts
Skills/Tools: Python (Pandas, NumPy), Jupyter Notebook
- Developed a chrome extension to mediate conflicts on Reddit using JavaScript and Python
- Detected nuances in language indicative of conflict on Reddit using Natural Language Processing
- Generated and analyzed toxicity scores for comments on Reddit to identify monotonic trends of toxicity within conversations

2021	Developing Interactive Tool to Assist Cyber Analysts in Detecting Anomalous Behavior on Machines **Aaleyah Lewis**. *ORNL Research Symposium*
2020	Virtual Reality in Environmental Education: Investigating the Efficacy of VR as an Educational Tool for Ocean Acidification **Aaleyah Lewis**. *Stanford University SURF Research Symposium*
2020	Conflict Mediation at Scale: Leveraging Big Data to Mediate Online Conflicts **Aaleyah Lewis**. *Undergraduate Research and Creative Achievement Day (URCAD)*

INVITED TALKS

CSE Accessibility Colloquium   2023

-

BlackcomputeHER Conference   2019
- The BlackcomputeHER Conference is dedicated to supporting Black women in pursuing careers in technology. As a featured panelist, I spoke about my experience being a Black woman in STEM as well as an undergraduate researcher to encourage young girls to get involved in computing.

Louis Stokes Alliances for Minority Participation Summer Bridging Conference   2018, 2020
- As a featured panelist for the LSAMP Summer Bridging Conference, I spoke with incoming freshmen on how to successfully navigate their upcoming academic journeys.

SCHOLARSHIPS & AWARDS

College of Engineering Dean's Fellowship	2021
GEM Fellowship	2021
ARCS Foundation Fellowship	2021
Lockheed Martin Scholarship	2021
UMBC Undergraduate Researcher of the Week	2020
Cisco Security Business Group Scholarship	2020
Stanford University Scholar Spotlight	2020
Summer Research Institute Fellow	2020
ACM Richard Tapia Scholarship	2020
Georgia Tech Focus Scholar	2019
Lockheed Martin Scholarship	2019
UMBC Undergraduate Research Award Recipient	2019
Grace Hopper Celebration Scholarship	2019

CLASS PROJECTS

The Intersection Deck, *Computer Ethics*   September 2021 – December 2021
The Intersection Deck is a card-based design tool for integrating intersectional perspectives into technology design. This system has two main components: a design methodology to generate intersectional, value-based design cards with non-designer participants whose intersectional identity facets are underrepresented in technology design, and a card-based design tool to be used by technologists within the design process.

GritView, *Software Engineering*   September 2020 – December 2020
This API provides students with access to data relating to course details, professors, course grades and course evaluations from the University of Maryland, Baltimore County (UMBC). We used python and Flask for the web framework and developed the database using PostgreSQL. Agile Scrum methodology was used throughout this process with 2-week sprints. As a developer for this project, I designed the course endpoint, which had two query parameters (i.e., course name and semester), and returned the course details, professors who taught the course and the grades received in the course.

Wine Quality Assurance, *Artificial Intelligence*   November 2019 – December 2019
The goal of this project was to predict wine types qualitatively (i.e., red, white) using binary classification. In addition, I predicted wine quality using regression with a quantitative value ranging from 1-10, inclusively. In order to complete this task, I used Random Forest, Logistic Regression, and Neural Networks for classification methods. For regression methods, I used SGD Regressor, Decision Tree, Linear Regression.

LEADERSHIP

A Vision for Electronic Literacy & Access (AVELA)   2021 - present
- This organization serves to bridge the opportunity gaps presented in STEM education for underrepresented minorities. I assisted in the development of curriculum that will be distributed to Mathematics, Engineering, Science, Achievement (MESA) instructors to teach K-12 students computer science. I also helped to develop a 2.5 hour lesson plan and design activity for teaching 3D modeling to students in the Black Student Union at Kentridge High School.

Ronald E. McNair Postbaccalaureate Achievement Scholars Program   2018 – present
- This program is designed to prepare students for graduate studies across all disciplines. As a McNair Scholar, I am involved in a community of diverse scholars who are pursuing a Ph.D. I served as the McNair Ambassador for Recruitment and Special Event where I designed and implemented recruitment efforts to increase student interests and enrollment into the program. In addition, I served as a conference ambassador where I helped plan and host our annual research conference.

Louis Stokes Alliances for Minority Participation (LSAMP) Program   2017 - present
- This program aims to substantially increase the amount of minority students attaining graduate degrees in STEM fields. As a LSAMP Scholar, I have conducted research at my home institution through their fall and spring semester research fellowship programs. I have also participated as a panelist for the 2018 and 2020 LSAMP Summer Bridging Conference which provides incoming freshmen with insight on how to successfully navigate their upcoming academic journeys.

National Society of Black Engineers (NSBE)   2017 – present

- This collegiate organization's goal is to increase the number of culturally responsible Black Engineers who excel academically, succeed professionally and positively impact the community. As an active member of NSBE who desires to give back to my community, I became a mentor to help lowerclassmen navigate their undergraduate careers and prepare for their journeys beyond.

Center for Women in Technology (CWIT) Scholars Program   2017 - 2021

- This program aims to enable success for women and other minorities in STEM fields. As an active affiliate, I was on the CWIT Bites and Bytes committee where I helped to plan an overnight program for high school girls who are interested in pursuing STEM related careers.
